Designing products in strategic ways to successfully reach the business goals, while making sure the user needs are fulfilled through intuitive experience.

Experience

Product Designer • Sep 2019 – Present

CitizenMe • London, UK

CitizenMe is a London based market research startup. As a Product Designer, I'm leading the design section of the company. My major responsibilities are doing user research, designing products for web and mobile, prototyping, collaboration with development team and so on.

UI/UX Designer (Remote) • Dec 2017 – Feb 2018

Caper.ai • New York, USA

I was the only designer of this innovative product. Worked closely with the product manager and developer team. My role started from ideation, taking design decisions, sketching, wireframing to designing high fidelity user interface and prototyping.

ACHIEVEMENTS

- Caper became world's first AI-powered shopping cart, according to Forbes, 2019
- Caper achieved \$13Million of investments

UI/UX Designer (Remote) • Dec 2015 – Sep 2018

LeadFuze • Arizona, USA

In LeadFuze, I had the chance to design the application almost from scratch. I worked very closely with the CEO and developer team. I have designed the entire web based platform, all the web pages (including social media designs). My rules were doing user research, wireframing, designing user interfaces and prototyping.

ACHIEVEMENTS

- According to SoftwareWorld.co, LeadFuze is one of the top lead generation app
- From a early startup, it is now a grown company having team globally

Freelance Designer • 2011 – 2019

Freelance Marketplaces (Upwork, Fiverr, Envato)

As a freelance designer I have completed 200+ projects in marketplaces. Since my start in 2011, I have always remained 100% job successful rate. Worked with some big companies such as Nissan Motors, Universal Weather and Aviation etc. Achieved TOP RATED freelancer badge in Upwork Inc (freelance marketplace) where I did most of my freelance projects.
